

FEDERICO JOHANNSON

Systems engineering

PERSONAL DATA

Age: 20 years old.

Birthdate: 27/05/2003

CUIL: 20-44824627-3

ABOUT MI

I am a systems engineering student and I am in the second year of my degree.

I am currently working as a Freelance developer.

I consider myself someone extremely dedicated.

I love learning new things, so I find myself constantly studying, whether taking courses or on my own.

I really like designing systems, but also developing them, since in design I usually come up with complex ideas that I know how to solve in development but that I understand that not everyone would do it that way.

HIGHER EDUCATION

UNIVERSIDAD ABIERTA INTERAMERICANA:

Systems engineering, in progress.

Completion expected in December 2026.

General average: 8.75

ACQUIRED KNOWLEDGE:

- Extraction of system requirements.
- System analysis and design.
- Development of desktop applications using C# in the .NET Framework.
- Development of desktop applications using C++.
- Design and management of databases using SLQ with SQLServer.
- Agile methodologies like "SCRUM".

COURSES

- C# and .NET Framework for developing desktop applications.
- Python and Django Framework for web application development.
- SQL and PostgreSQL for the development of databases used in applications made with the knowledge acquired in the two previous courses.
- Basic computer security to detect vulnerabilities in systems and prevent attacks.

WORK EXPERIENCE

Freelance Developer:

March. 2023 - present

Completed tasks:

- My work is mainly based on the development of desktop applications made in the ".NET Framework" with "C#" and with the purpose of managing small businesses. For example, one of my most recent jobs is the client management system for a gym in my neighborhood with the possibility of customizing routines for each client.
- I have also made some web pages for some small companies with the use of "Wordpress", which can be seen from the portfolio of my own website that you will find in the contact section.
